

## EASTERN POINT DAY SCHOOL

INSPIRE • CHALLENGE • EDUCATE

Dear Parents and Friends,

Thank you for your interest in Eastern Point Day School, a non-profit, community-based school serving children in grades PreK – 8. EPDS, located in scenic East Gloucester, teaches developmental and academic skills and concepts in multi-age classrooms of 6 – 10 students. Emphasis is placed on a classical education while also preparing children to be happy and successful in the 21<sup>st</sup> century.

Practice and research have proven that relevance is the most effective strategy for mastering skills and concepts. When children relate information and material to their world, they are most successful remembering, understanding, applying, analyzing, evaluating and creating – the hierarchy of thinking essential to success in today’s world. At EPDS, teachers and staff use an interdisciplinary, experiential approach to connect the “people, places, and things” in each child’s world bringing meaning to learning.

In addition to the academic subjects of Reading/Language Arts, Mathematics, Science, and Social Studies, EPDS supports the core curriculum with Art, Dance/Drama, Music, Physical Education and Spanish. Affiliations and partnerships with area artists, museums, a stage company, the YMCA, the Boston School of Modern Languages, and local colleges are examples of EPDS’s commitment to supporting and utilizing local resources to expand teaching and learning opportunities for our students and teachers.

The strength of Eastern Point Day School is solidly based in a dedicated and committed school community – children, parents, teachers, and partners – all working together in the spirit of cooperation, collaboration and excellence. Throughout the year, activities and events bring families, staff, and community members together as we strive to provide our children with the best school experience.

Thank you for learning more about Eastern Point Day School. I appreciate your interest and hope that you will consider EPDS for your child’s education.

Sincerely,

Robert Teel  
Headmaster
